Using Renewable Energy in Schools

With support from HIMCOSTE, CSE and GSP have initiated a long-term partnership with schools in Himachal Pradesh that are taking long and purposeful strides towards transitioning to renewable energy. The Solar 30 Workshop, under the canvas of CSE's 2023 Green Schools Carnival, is being organised to celebrate this partnership, and the people and institutions that have made it possible.

We invite principals, teachers and students from Himachal schools and District Science Supervisors from their respective districts to join us in this workshop. To understand how much schools have done and what more can they do. And to applaud those schools that are shining examples of how much can be done.

This event is open only to nominated and shortlisted schools from Himachal Pradesh.

STUDENT'S WORKSHOP

SOLAR CONNECT

February 22, 2023 | 11.45 AM - 1.30 PM

Magnolia, India Habitat Centre, Lodhi Road, New Delhi

Making household things that can use solar energy

Join **Vivek Singh** of Gramlight in a creative workshop – exclusively for students from Himachal Pradesh!
